Experience

Web Engineer

EVENTZILLA

Oct 2018 - present

Core team at Eventzilla, building a *Friendly and inclusive Q&A community for coders*. Features required me working across the stack, with **ReactJS** in the frontend and .NET in the backend.

- Optimized the page load performance, bringing load times down from 11 to 4 seconds.
- Currently working on a re-write of the client side app, focusing on performance.

  Worked on Backoffice Panel, a CMS for internal use.built using **Angular4**

Junior Software Developer

SNACKEXPERT.COM
MAR2017- SEPT2018

Contributed to the web stack (front-end and server-side, **ExpressJS + MONGODB + ANGULAR**) that impacts millions of users across snackexprts products

A few features I worked on here were:
- Revamping Login/singup flow page
-Automated the Ad listing-fees' sales & payment

process, as well as the Buy-Now workflow.

Projects

[http://rbinew.her](http://rbinew.herokuapp.com)
okuapp.com

Online Inventory System maintain and schechudling products stack which I used React and Node js
